

ACTIVITIES

UNIBO is one of the biggest Italian Universities with 11 schools and 33 departments, covering all field of research from humanities to social science, from medicine to engineering, chemistry and material science. An interdepartmental center and laboratory (Lab4Pack) is active on Packaging related research.

ACTINPAK FOCUS

At UNIBO different type of active packaging are studied considering different types of oxygen scavengers or antimicrobial substances. Analysis and modelling of active substance release and oxygen scavenger activity are among the specific expertise of the group directly participating to ActInPak.
