How does intelligent and active packaging work?

COST FP1405 ActInPak aims to identify and overcome the key technical, social, economic and legislative barriers to a successful deployment of renewable fibre-based functional packaging solutions such as active and intelligent packaging.

ABOUT

The Action achieved the objectives by providing an open multidisciplinary platform for the complete paper and board packaging value chain and had a strong involvement of industrial partners throughout Europe.

Sustainable fibre-based packaging materials with new and active functionalities may help to introduce new products on the market with higher value and profits for paper and board manufacturers than traditional products.

Intelligent packaging

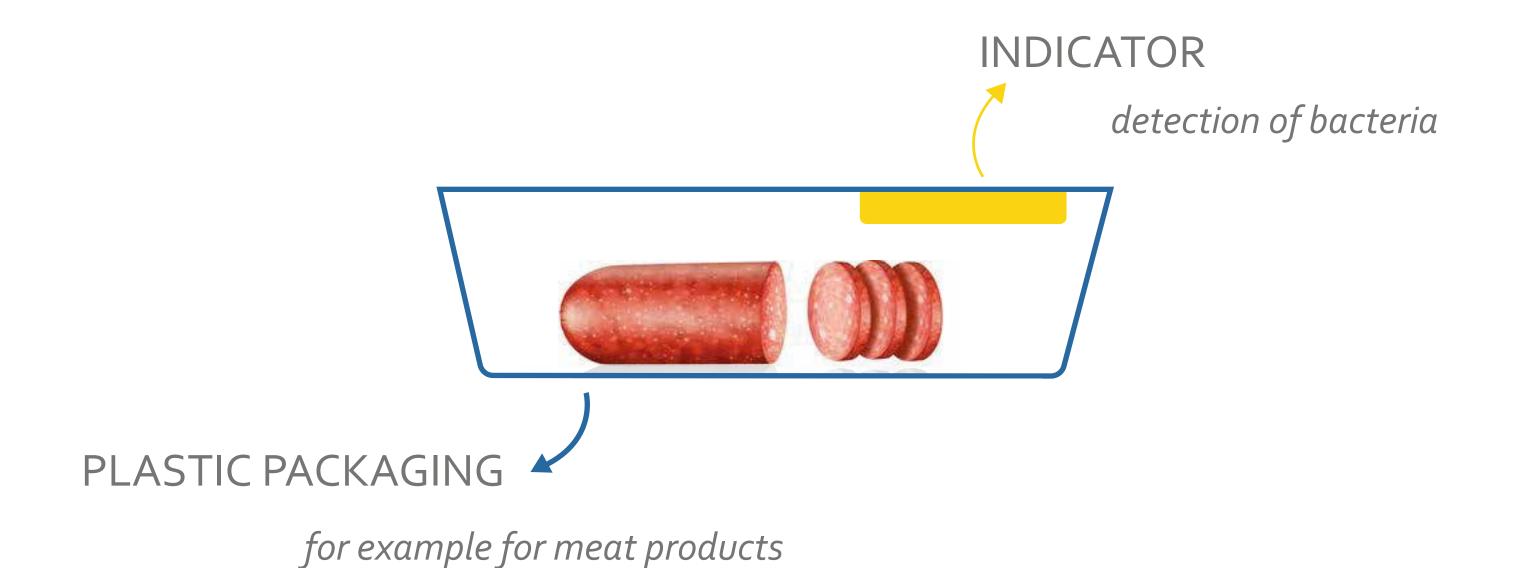

Demonstrator 1

INTELLIGENT PACKAGING

YouTube video

https://www.youtube.com/watch?v=3b-lnxkziP8

Active packaging

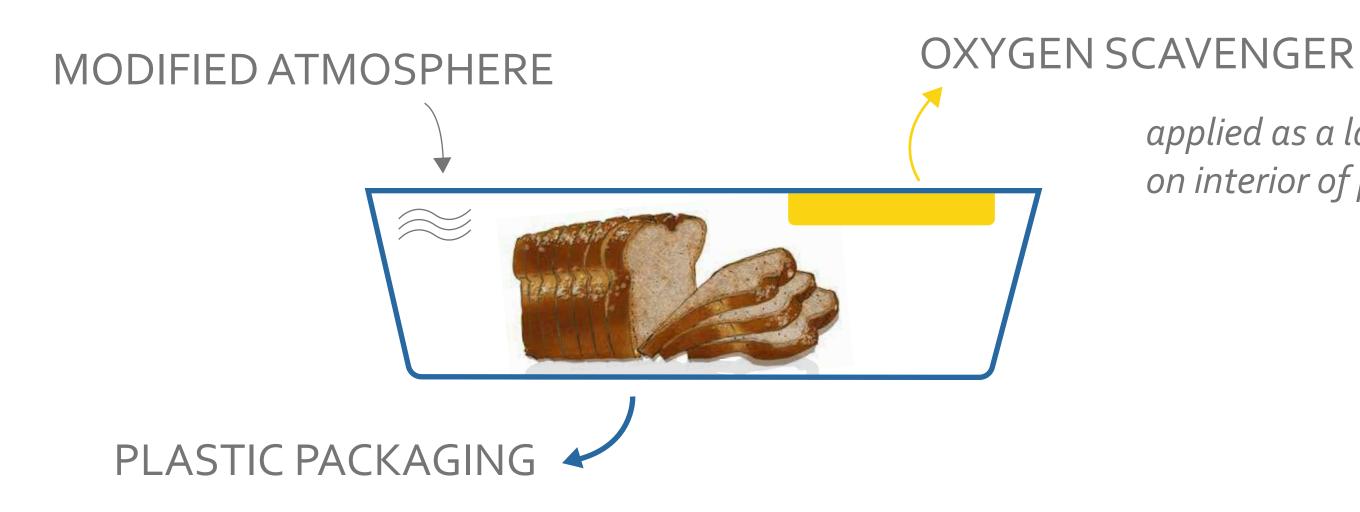

Demonstrators 2 & 3

ACTIVE PACKAGING

applied as a label on interior of packaging

for example for pre baked bread

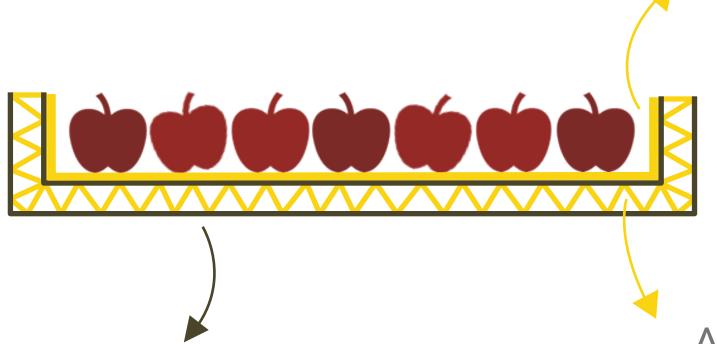

ACTIVE PACKAGING

ETHYLENE SCAVENGER

scavenging inner layer

CORRUGATED BOX

for example for fruits

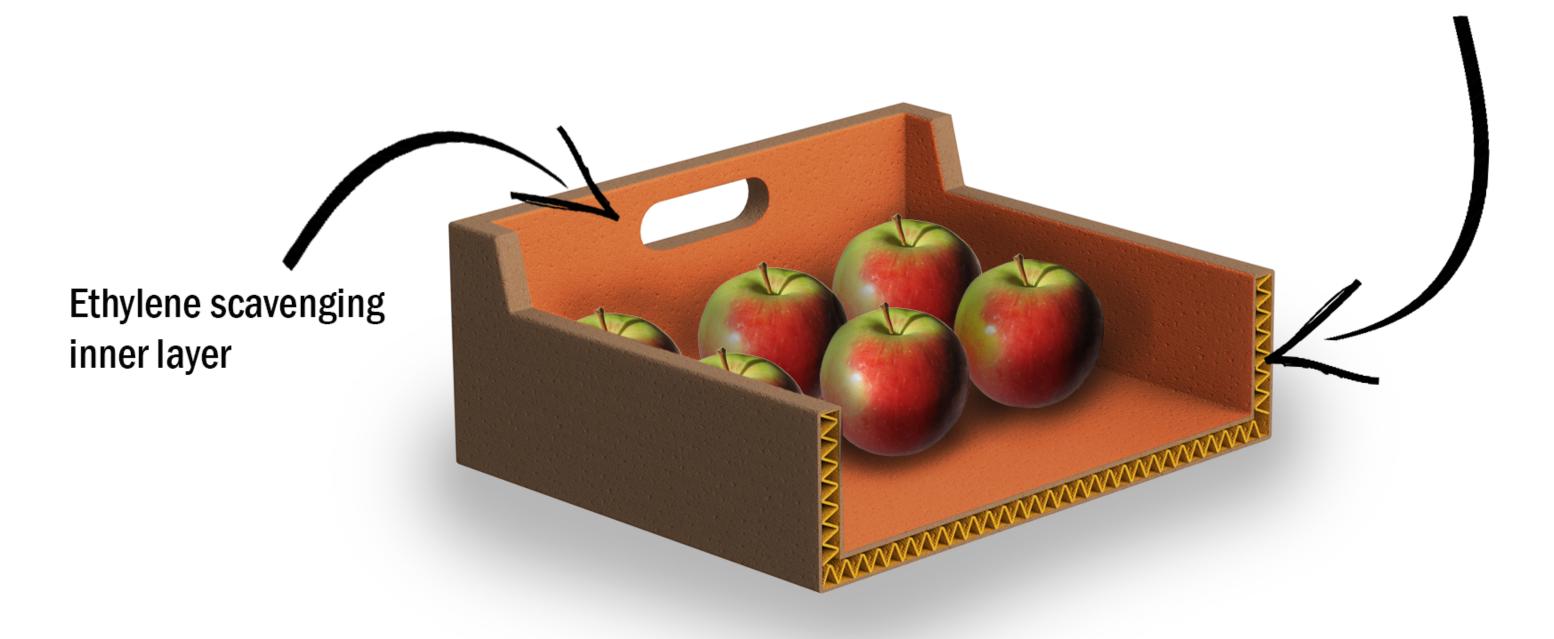

ANTIBACTERIAL / ANTI-MOULD

corrugated layer sandwiched between inner and outer layer

Corrugated Box

Fruit example

Antibacterial / anti mould Corrugated layer sandwiched between inner and outer layer

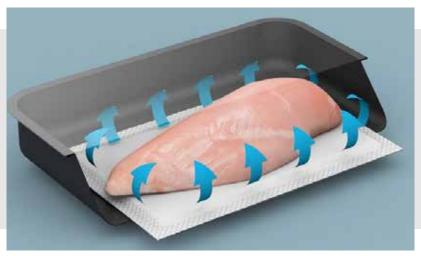

ActInPak is a pan European (COST) network of the leading experts in active and intelligent packaging of 209 academic institutions, 35 technical centers and 83 industrial partners of 34 different countries.

Main goal is to develop a knowledge-based network on sustainable, active and intelligent fibre-based packaging in order to facilitate its introduction on the market.

Acknowledgement

ActInPak is supported by COST (European Cooperation in Science and Technology).

COST is a funding agency for research and innovation networks.

Our actions help connect research initiatives across Europe
and enable scientists to grow their ideas by sharing them with their peers.

This boosts their research, career and innovation.
